

National Federation of State High School Associations

POSTING FOR THE POSITION OF

Software Developer

January 22, 2021

NOTICE IS HEREBY GIVEN that the National Federation of State High School Associations (NFHS) is posting a Software Developer position for consideration. This position will remain open until Friday, February 5, 2021.

The Software Developer will be responsible for the development, enhancement, and support of software applications that improve end-user performance and support internal and external programming.

Required qualifications: Bachelor's Degree in Computer Science or Informatics

Areas of responsibility: Technology | Software and Database Development

Submit letter of application and resume by Friday, February 5, 2021 to Mautrice Meriweather, Chief Talent Officer at employment@nfhs.org.

Starting Date: March 1, 2021 or negotiable

Salary and Benefits: Commensurate with candidate's experience.

JOB DESCRIPTION

POSITION TITLE: Software Developer	FLSA STATUS: Non-Exempt
	REPORTS TO: Manager of Technology Development
	SUPERVISES: None

GENERAL DESCRIPTION OF POSITION: The Software Developer is responsible for the creation, development, enhancement, and support of software applications that improve end-user performance and support internal and external programming. The position will provide concise user interfaces, automation of tasks, and the ability to compile information from databases.

The Software Developer will work with small teams of staff, state associations, and professional memberships as necessary to gather requirements, demonstrate applications at milestones for approval, and move applications into the implementation phase.

This position is primarily focused on full-stack web development running on IIS and using MS SQL Server databases hosted in AWS and Azure.

ESSENTIAL AND RELATED JOB RESPONSIBILITIES:

- Designs and develops software applications for internal and external users.
- Designs and develops databases and data structures, including their tables, relationships, functions, and stored procedures.
- Performs maintenance and updates on custom software applications.
- Supports users on custom applications.
- Takes project requirements and creates development plans.
- Compiles information from databases into reports.
